

# McLean Maple Farm Delivery & Planting Services

All deliveries are in an enclosed cargo trailer or covered with shade cloth in an open trailer. This prevents any wind damage to the trees. If you are going to transport your own large trees, we suggest looking into renting (or borrowing) an enclosed trailer.

We have a 5 x 9 trailer available for local rental which has a shade cloth cover. Local rentals only & must be returned the same day.

If you plan on transporting a tree in an open truck or trailer while it has leaves, an old bed sheet taped around the leaves will help with wind damage while transporting.

We do have shade cloth available for a small fee to wrap the tree leaves .

## Local Delivery Fees

Due to variances in deliveries all delivery fees must be set based on tree(s), distance, etc.

The minimum delivery charge is \$75.00 for distance up to 25 miles

Delivery charges due upon delivery. Cash only. No credit cards

## Planting

**For any large container (over 10 gallons) you will need to have your utilities marked prior to digging. You can do this by calling 811 & placing a request.**

We will not dig out your old stump from a tree you had cut down. We do not remove trees. We can give you contact information for a tree cutter and stump grinder if needed. These are 2 of the very few people we recommend.

Included in planting service:

Custom blended soil ammendments & fertilizer (depending on time of year)

Mulch is not included, if you provide mulch we will spread it

We have a 3<sup>rd</sup> party who will provide planting services. You can get their contact information from Angie. They will have to provide fee information for planting (and delivery if needed).
